SKILLS

MOBILE

Flutter · Dart · Riverpod · Bloc · Android · Java · Kotlin · Jetpack Compose · React Native · TypeScript

HARDWARE

Bluetooth LE · Bluetooth Classic · Device protocols · OTA updates · Arduino

CLOUD & DATA

Azure · Firebase · Google Cloud · FastAPI · Node.js · SQLite · SQL

VISION & 3D

TFLite · OpenCV · PyTorch · CUDA · COLMAP · ARCore

TOOLS

Git · Android Studio · Xcode · Claude Code

EDUCATION

B.S. Software Engineering
University of Texas at Arlington
Dec 2023 · GPA 3.5

Benjamin Farmer

Mobile Software Engineer

Flutter • Android • Bluetooth LE • Hardware-connected apps

Mobile engineer building Flutter and Android apps that control real hardware over Bluetooth LE. 2+ years shipping apps for Stalker Radar's police, traffic, sports, and river-flow radars, from firmware protocol to cloud.

5	18	1,100+	~3K
hardware-connected apps	months as sole Android developer	automated tests written	monthly users on Stalker Sport

EXPERIENCE

Applied Concepts, Inc. (Stalker Radar) · Richardson, TX — May 2024 – Present

Mobile Application Developer · Co-project manager for the Task Force and Device Manager apps

Stalker Task Force Police LIDAR & radar app — Android · Java · Flutter

- **Sole Android developer** for 18 months; used by police in Ohio and Alaska
- Built Bluetooth radar control: live screen mirroring, encrypted commands
- Built LIDAR-triggered evidence video with speed overlays and offline upload
- Co-leading the **Flutter rewrite** (launching Oct 2026); wrote 877 of its tests
- Reproduced a radar firmware deadlock by compiling its C code to WebAssembly

StreamSense River-flow radar app for field crews — Flutter · Riverpod · Azure

- **Lead developer** from initial implementation through TestFlight beta
- Built offline-first storage, Azure cloud sync, and maps for the US and China

Street Dynamics Device Manager Roadside speed-sign app — Flutter · BLE

- Built app support for a new sign model, including school-zone scheduling
- Sped up traffic-data downloads from ~35 to **~2,000 records/s**
- Built an Arduino sign simulator to test firmware updates without hardware

Stalker Sport Sports radar app with paid subscriptions — Flutter · Kotlin

- Shipped Android slow-motion video with a native Kotlin Camera2 plugin

Street Dynamics Portal Cloud fleet app for speed signs — React Native · TypeScript

- Primary developer since mid-2025; added support for 4 new sign models

PROJECTS

3D Room Scanner — Flutter · Firebase · Python · CUDA

Personal · 2-person retail proof of concept · 2026

- Turns a phone walkthrough video into a navigable 3D model using Gaussian splatting
- Flutter capture app → Firebase → GPU reconstruction server (COLMAP, Faster-GS)
